

CS201 Quiz 2 (Fall 2004)

Name: _____

University ID: _____

Instructions

- This is a closed-book quiz.
- The quiz has 10 questions, and the full mark is 100.
- Write the answer for each question in the space provided below the question.

| Question | Marks |
|--------------|-------|
| 1 | |
| 2 | |
| 3 | |
| 4 | |
| 5 | |
| 6 | |
| 7 | |
| 8 | |
| 9 | |
| 10 | |
| Total | |

1. (30 marks – 2 each) Let $A = \{1, 2, 3, 5, 8, 11, \{3\}, \emptyset\}$. Identify each of the following as True or False. $P(X)$ means that power set of X .

| | True | False |
|-------------------------------------|------|-------|
| (1) $\{5, 11\} \subseteq A$ | ✓ | |
| (2) $\emptyset \in A$ | ✓ | |
| (3) $\{3\} \in A$ | ✓ | |
| (4) $\{3\} \subseteq A$ | ✓ | |
| (5) $\{\{3\}\} \in A$ | | ✓ |
| (6) $\emptyset \subseteq A$ | ✓ | |
| (7) $\{1, 6\} \subseteq A$ | | ✓ |
| (8) $\{1, \{2\}\} \in P(A)$ | | ✓ |
| (9) $\{\emptyset, \{3\}\} \in P(A)$ | ✓ | |
| (10) $\emptyset \subseteq P(A)$ | ✓ | |
| (11) $\{\emptyset\} \in P(A)$ | ✓ | |
| (12) $\emptyset \in P(A)$ | | ✓ |
| (13) $\{3\} \in P(A)$ | ✓ | |
| (14) $\{1, \{3\}\} \in P(A)$ | ✓ | |
| (15) $\{1, \{3\}\} \subseteq P(A)$ | | ✓ |

2. (6 marks – 2 each) For any two sets A and B , if $B \subset A$, then

- (a) $A \cup B = A$
- (b) $A \cap B = B$
- (c) $B - A = \emptyset$

3. (10 marks – 2 each) Let $A = \{2, 3, 4, 5, 7, 9\}$ and $B = \{1, 2, 5, 6, 8, 10\}$. Compute:
- (a) $A \cap B = \{2, 5\}$
 - (b) $A - B = \{3, 4, 7, 9\}$
 - (c) $B - A = \{1, 6, 8, 10\}$
 - (d) $A \cup B = \{1, 2, 3, 4, 5, 6, 7, 8, 9, 10\}$
 - (e) $P((A-B) \cap B) = \{\emptyset\}$
4. (4 marks – 2 each) Draw a Venn diagram to find the sets A and B, if $A - B = \{4, 5\}$, $B - A = \{6, 7\}$, and $A \cup B = \{3, 4, 5, 6, 7, 8\}$.
- Answer:** $A = \{4, 5, 3, 8\}$
 $B = \{3, 6, 7, 8\}$
5. (10 marks) Proofs:
- (a) (5 marks) Are the following two sets equal? If they are equal, prove it using mutual inclusion. If they are not equal, find a counterexample.
- $A = \{x \mid x \in \mathbb{Z}_+ \text{ and } x = 3m \text{ for } m \in \mathbb{Z}_+\}$
 $B = \{x \mid x \in \mathbb{Z}_+ \text{ and } x = 3n+6 \text{ for } n \in \mathbb{Z}_+\}$
- Answer:** They are not equal. For example, $3 \in A$, but $3 \notin B$.
- (b) (5 marks) Are the following two sets equal? If they are equal, prove it using mutual inclusion. If they are not equal, find a counterexample.
- $A = \{x \mid x \in \mathbb{Z} \text{ and } x = 3m \text{ for } m \in \mathbb{Z}\}$
 $B = \{x \mid x \in \mathbb{Z} \text{ and } x = 3n+6 \text{ for } n \in \mathbb{Z}\}$
- Answer:** They are equal.
- Proof sketch: (1) assume $x \in A$, $x = 3m = 3(m-2) + 6$. Since $m-2 \in \mathbb{Z}$, we can use $m-2 = n$, thus,
 $x \in B$.
 (2) assume $x \in B$, $x = 3n+6 = 3(n+2)$. Since $n+2 \in \mathbb{Z}$, we can use $n+2 = m$, thus
 $x \in A$
6. (10 marks – 2 each) Answer for the following questions:
- (a) A small town has 300 residents. Must there be 2 residents who have the same birthday.
No.
 - (b) Let $S = \{1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11\}$. Suppose 5 integers are chosen from S. Must there be two integers whose sum is 12?
No.
 - (c) Let $S = \{1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11\}$. Suppose 6 integers are chosen from S. Must there be two integers whose sum is 12?
No.
 - (d) How many integers must you pick in order to be sure that at least two of them have the same

remainder when divided by 11?

12.

- (e) How many people must be in a group in order to be sure that at least two people have exactly the same first and last initials?

$$26 \times 26 + 1 = 677$$

7. (10 marks – 2 each) ρ is a relation on set $\{a, b, c, d\}$. Which one (ones) is (are) equivalence relation(s)? No mark will be given if you mark everyone or you do not mark anyone.

- | | |
|--|---|
| a) $\rho = \{(a, a), (b, b), (c, c), (d, d)\}$ | Y |
| b) $\rho = \{(a, a), (b, b), (c, c), (d, d), (a, b), (b, a), (a, c), (c, a), (a, d), (d, a)\}$ | N |
| c) $\rho = \{(a, a), (b, b), (c, c), (d, d), (a, d), (d, a)\}$ | Y |
| d) $\rho = \{(a, a), (b, b), (c, c), (d, d), (b, c), (c, b), (c, d)\}$ | N |
| e) $\rho = \{(a, a), (b, b), (c, c), (d, d), (a, b), (a, c), (b, a), (b, d), (c, b)\}$ | N |

8. (10 marks – 2 each) Each of following is a relation on $\{a, b, c, d\}$. Which one (ones) is (are) partial order(s)? No mark will be given if you mark everyone or you do not mark anyone.

- | | |
|--|---|
| a) $\rho = \{(a, a), (b, b), (c, c), (d, d)\}$ | Y |
| b) $\rho = \{(a, a), (b, b), (c, c), (d, d), (a, b), (b, a), (a, d), (a, c), (a, a), (d, a)\}$ | N |
| c) $\rho = \{(a, a), (b, b), (d, d), (a, c), (a, d), (c, a), (c, d)\}$ | N |
| d) $\rho = \{(a, a), (b, b), (c, c), (d, d), (b, c), (b, d), (c, d)\}$ | Y |
| e) $\rho = \{(a, a), (b, b), (c, c), (d, d), (a, b), (b, c), (a, c), (a, d), (b, d), (c, d)\}$ | Y |

9. (2 marks) Given the following equivalence relation $\{a, b, c, d, e\}$, find the equivalence class of c, $[c]$.

$$\rho = \{(a, a), (b, b), (c, c), (d, d), (e, e), (c, d), (c, e), (d, c), (d, e), (e, c), (e, d)\}$$

Answer: $[c] = \{c, d, e\}$

10. (8 marks) Given the following partial order on $\{a, b, c, d, e\}$

$$\rho = \{(a, a), (b, b), (c, c), (d, d), (e, e), (a, b), (c, e), (b, d), (a, c), (a, d), (a, e)\}$$

- a) (4 marks) Draw the Hasse diagram of relation ρ .

- b) (4 marks) Give maximal elements, minimal elements, least element and greatest element, if any exists? If anyone of them does not exist, indicate it with a “no”.

minimal elements: a

maximal elements: d, e

least element: a

greatest element: No.
