Lecture 27: tunneling and firewalls
amazon's IPv6/4 address (::ffff:148.7.6.5)
nat here would be 6to4 tunneling

Figure 4.26  Tunneling
public internet → firewall → private network
Netfilter / IPTABLES Traffic Flow
Daniel Miessler

Chains are represented in blue, and the tables they can be called from are listed in red.
::ffff:128.76.87.9  128.76.87.9
