

Spring 2017 Syllabus
UIC CS 477,
Public Policy, Legal, & Ethical Issues in Computing, Privacy, and Security;
Chicago-Kent Special Topics, Computer and Network Privacy and Security

Tuesdays and Thursdays, 2:00–3:15

Team taught:

Prof. Robert Sloan, UIC Computer Science Department, sloan@uic.edu

Office hours: 10–11 am Tuesdays, 1112 SEO (or drop by—I'm in a lot)

Prof. Richard Warner, Chicago-Kent/IIT School of Law, rwarn@kentlaw.iit.edu

This unusual course will meet with a mixed class of UIC students from computer science, communications, and other disciplines concerned with privacy and security in the modern era, and Kent Law school students. Meeting times:

Tuesdays: IIT Chicago-Kent, 565 West Adams, room 520.

Thursdays: UIC, 317 Burnham Hall. (A little southwest of the central quad in the big block bounded by Harrison, Taylor St., Halsted, and Taylor. Campus map available at <https://psch.uic.edu/docs/default-source/default-document-library/map---east-campus.pdf?sfvrsn=2>.)

Course Description, Goals, and Objectives

In this course you will learn what is "inside the box" of modern electronic security and privacy. We will do our best to make the course self contained, so law students will learn about how tracking cookies, cryptography, and malware work, and computer science students will learn how to read appellate court decisions, and everybody will learn a bit of economics.

Required book:

Sloan and Warner, *Unauthorized Access: The Crisis in Online Privacy and Security*, available in the CK and UIC bookstores and on Amazon,

<http://www.amazon.com/Unauthorized-Access-Crisis-Privacy-Security/dp/1439830134>.

Recommended book:

James Rule, *Privacy in Peril*, <http://www.amazon.com/Privacy-Peril-Sacrificing-Fundamental-Convenience/dp/0195394364>

Numerous other provided readings.

Course requirements, evaluation, and grading

The heavy majority of the course grade will be based on an original term paper on a policy topic of the student's choice.

Other small factors will include:

- Occasional short written or technological assignments, graded on a completed/not completed basis
- Participation in in-class discussion

Course Topics

Security

1. *The data breaches and voting machines: Week of January 17*

Sloan/Warner, Chapter 1, Chapter 8, pp. 181–187 only.

Bruce Schneier, *The Security Mindset*, March 2008,
