CS Seniors Ready for Graduation

CS hosted a celebration on April 18th for undergraduate students who will be graduating on May 13th. The Spring semester graduates are among 170-180 students who intend to graduate with their Bachelor of Science in CS as part of the Class of 2018.

Students and faculty were able to mingle over dinner and discuss their experiences while attending UIC. The celebration is also an opportunity for the CS faculty to get feedback from students regarding their experience at UIC, specifically within the CS department. Professors Troy and Hummel discussed topics with students to help improve curriculum, improve retention and discover what will help set freshmen students up for success when they arrive in the fall.

The graduating seniors also gathered for a group picture (above) which they are encouraged to sign and write down their post-graduation plans, as a matted version will hang permanently outside the CS Student Affairs office. Congratulations to the graduates!

BS, 2018
Headed to:

“Graduating with a CS degree has been unbelievable for me at times, but ultimately exciting! I’m glad I reached this point in my life and can’t wait to take the skills I’ve learned at UIC out to the real world to make a difference. As for post-graduation, I plan on working as a Software Engineer at CDK Global where I’ll be designing mobile applications for our clients!”

Say Objective-C! . . .

Class of 2018 CS undergraduate students pose with faculty members at their annual celebration in the CS Student Lounge. Graduation is May 13th at the UIC Pavilion.
